Vital Signs

Blood Pressure

101/67
Optimal

Oxygen (SpO₂)

96%
Excellent

Pulse

86 BPM
Normal

Temperature

98.3°F
Normal

What Today's Scan Already Tells Us

✓ Oxygen delivery appears efficient and consistent

✓ Blood pressure stability suggests good cardiovascular health

✓ Hydration levels are supporting consistent metabolic readings

✓ Repeated measurements show stability across vitals

✓ Pattern consistency suggests balanced physiological regulation

✓ Data confidence at 86% enables reliable health pattern recognition

Advanced Integration Analysis

Complete integration analysis unlocked! All body masses visible

 **Fat-Free Weight**
Lean Body Mass

44.5 kg

Lean Machine

Jiya, 44.5kg of pure power! Elite composition.

 **Remedy**

Maintain diet + training

 **BSA**
Body Surface Area

1.48 m²

Small Body Size

Jiya, 1.48m² is small. Gain healthy weight!

 **Remedy**

Nutrient-rich diet

 **Fat Dominance**
Fat vs Muscle

-28.0%

Muscle Dominant

Jiya, muscles dominate by 28.0%! Beast mode!

 **Body Density**
Tissue Compactness

1.076

g/cm³

High Density (Lean)

Jiya, 1.076 g/cm³, solid and lean!

Water Mass

27.0 kg

Adequate Water

Jiya, 27.0kg water in your body!

Muscle Mass

18.8 kg

Average Muscle

Jiya, 18.8kg muscle power!

Fat Mass

4.9 kg

Lean

Jiya, 4.9kg fat to manage!

Subcutaneous Fat

4.2 kg

Healthy Fat Storage

Jiya, 4.2kg under-skin fat!

Body Weight Insight

Current weight: **49.4 kg**

Your body weight should be interpreted alongside muscle and hydration data for a complete picture.

Current Health Status

Body Composition

Parameter	Status
Skeletal Muscle Mass	26.6%
Body Water	54.6%
Body Fat	10%
BMI	19.8

Metabolic Profile

Parameter	Value
FFMI (Fat-Free Mass Index)	17.8
BMR (Basal Metabolic Rate)	1216 cal/day
Metabolic Age	26 years

Full interpretation unlocks after repeated confirmation (7 scans).

Weekly Consistency Confidence: 85%

Your personal health model is now fully active.

Confidence reflects consistency across repeated scans, not a single reading.

The 7-Day Promise

85%

1 scan remaining to complete your cycle

 Eco Impact:

 120L water

 108g CO₂

 3 trees eq.

Summary

Complete your 7-scan cycle for a full narrative summary based on repeated observations.

 Partial Assessment – Complete 1 more scan for full analysis
